

What is claimed is:

1 (currently amended). A wall mounting for detachably mounting a shower head, comprising:
a holder for the shower head wherein the holder is **attachable to a wall and** configured for engaging a location on a housing of the shower head provided for mounting the shower head, ~~that is unrecognizable as a shower head mounting, and acts~~ **the holder acting** by means of an interference fit along withdrawal and introduction directions **of the shower head;**
wherein the holder engages on the housing of the shower head by a pair of jaws gripping an outer perimeter of the housing of the shower head between two diametrically opposed locations on the housing of the shower head; and,
wherein the shower head is operational in the holder and remains operational when withdrawn from the mounting.

Claims 2-6 are canceled.

1 7(currently amended). A wall mounting according to claim **1-6,**
2 wherein the jaws are drawn toward one another when the shower head is in
3 place therein.

1 8(currently amended). A wall mounting according to claim **1-6,**
2 wherein the pair of jaws are joined to the holder for the shower head by a
3 component that is under tension.

1 9(previously presented). A wall mounting according to claim 8,
2 wherein the tensioning component is configured such that it contacts the
3 housing of the shower head over an extended area.

10(canceled).

1 11(previously presented). A wall mounting according to claim 1,
2 wherein the holder for the shower head is arranged between tines of a fork.

12(canceled).

1 13(previously presented). A wall mounting according to claim 1,
2 wherein the shower head is configured in a form of a hand-held shower head
3 having a grip attached to its housing.

1 14(previously presented). A wall mounting according to claim 1,
2 wherein the housing of the shower head is disk-shaped.
